1. ½” Ratchet Wrench.
2. ½” Wrench
3. Tape Measure

4. Drill & 3/8” Bit

Please Read Carefully

Attention: Read and understand all instruction and warnings before installing and operating or using this product. Mounting box properly is always very important. If done correctly, it will add longer life to your box. Always try to fasten box or brackets as parallel as possible, mount box as high from the ground as possible.

Danger: Do not use this product for transporting or storing flammables, explosives, hazardous material or hazardous waste, such as containers of propane, gasoline, solvents, gun powder, acetylene and cutting torches. This product is designed and safe for use in storing and transporting tools, equipment and similar material. Any modification made to this product, or unintended use of this product, could create a hazardous condition that can cause death, serious personal injury or property damage.

Warning: Before mounting this product, use extra precautions on placement. This product can reduce driver's ability to clearly see roadways, vehicular and pedestrian traffic, and other objects through the rear and side windows and mirrors of the vehicle. Make all adjustments necessary to ensure maximum visibility. State and local laws may prohibit obstruction of windows in a moving vehicle.

Note: Before drilling, make sure all electrical wiring and components, fuel tank and associated components are not in the drilling pattern.

Installation Steps

<p>Step 1: Check all parts by using the installation assembly parts list in this manual, and make sure all parts are with package. Look over the area where the box should be mounted to make sure that there is enough room to mount box.</p>	<p>Step 2: Remove all components from package and carefully move Box to mounting surface, where to be mounted to assure Box is mountable at that area. Holes are not predrilled in Box due to variations in mounting. Note: Always drill hole as far to the outside edge of Box as possible.</p>
<p>Step 3: Mark all four holes outside on bottom of Box where box will be mounted to flat surface, Remove Box and drill four 3/8” diameter holes at each mark on the mounting surface (refer to truck O.E.M. shop manual for recommended drilling instructions).</p>	<p>Step 4: Relocate Box back to mounting position. Insert bolts with washers (as shown on Drawing A) through the bracket, from Box side and slide bolts through the mounting surface. Place one flat washer under a lock nut on the back side of the mounting surface and tighten all nuts securely to complete installation.</p>

Maintaining & Caring For Your Box.

- | | |
|--|---|
| <ol style="list-style-type: none"> Lubricate hinges and all moving lock parts periodically with light household oil. Check and tighten bolts periodically. | <ol style="list-style-type: none"> Check and replace worn-out weather stripping as needed. |
